Garima

BE Computer Science and Engineering | Chitkara University | Second Year

[7814876590] | [garimasaluja5736@gmail.com] | https://github.com/GarimaSaluja | India

SUMMARY

Second-year BE Computer Science and Engineering student who builds and deploys real web and AI projects. Comfortable taking an idea from design to a live website, with hands-on experience in API integration and backend security through a Flask project. Looking to learn, contribute and grow in a tech community.

EDUCATION

BE, Computer Science and Engineering (CSE), Chitkara University 2025 - 2029 (second year)

Group G14 | Roll No. 2510990883

Coursework: Java (OOP, Collections Framework), Computer Networks, Database Management Systems (DBMS), Front-End Engineering (FEE), Operating Systems, C Programming

TECHNICAL SKILLS

Web	HTML, CSS, JavaScript, React (learning)	
Languages	Python, Java, C	
Backend and tools	Flask, Streamlit, Git and GitHub, REST APIs, Groq API, Tesseract.js (OCR)	(learning)
Deployment	GitHub Pages, Render	

PROJECTS

Verdana | Plant care web app

Live on GitHub Pages

- Designed and deployed a responsive plant care website with a modern glassmorphism interface.
- Live link: garimasaluja.github.io/Verdana

Tech stack: HTML, CSS, JavaScript, GitHub Pages

FactLens | AI hallucination auditor

Hackathon project

- Built a web app that checks AI-generated answers for unreliable or false claims, within hackathon time limits.
- Working on improving hosting so the app stays available for users.

Tech stack: Python, Streamlit

LegalMate | AI legal document analyzer

Currently working on

- Built a tool that reads legal documents (including scanned ones through OCR) and explains them in simple language using AI.
- Moved API calls from the browser to a Flask backend deployed on Render, keeping the API key secure on the server.
- Debugged multiple JavaScript issues during development.
- **Status:** project in progress, currently working on it.

Tech stack: HTML, CSS, JavaScript, Python Flask, Groq API, Tesseract.js, Render

STRENGTHS

- Builds and ships: takes projects from idea to deployment
- Security-aware: understands why API keys must stay on the server
- Fast self-learner who debugs problems independently
- Explains technical ideas in simple language

INTERESTS

Web development, AI applications, community learning, helping beginners get started in tech
